other’s contributions. Amplification will help students in the back of the room or those with mild hearing challenges fully participate. Students will be able to accurately identify and describe elements of a performance because they can clearly hear it. <u>Televisions for \$12,477.60</u> Televisions will be used to support the arts as the arts are integrated into every subject area. Integrating televisions into art instruction enhances both teaching effectiveness and student engagement by providing a dynamic visual learning experience. Art is a highly visual discipline, and televisions serve as powerful tools to display, analyze, and interact with visual content in ways that traditional methods cannot fully achieve. Televisions enable the integration of diverse media forms—such as videos, slideshows, virtual museum tours, and time-lapse recordings of artistic processes. This multimedia approach caters to varied learning styles and makes art concepts more relatable and memorable.
